[More choices](#)

OK Cancel

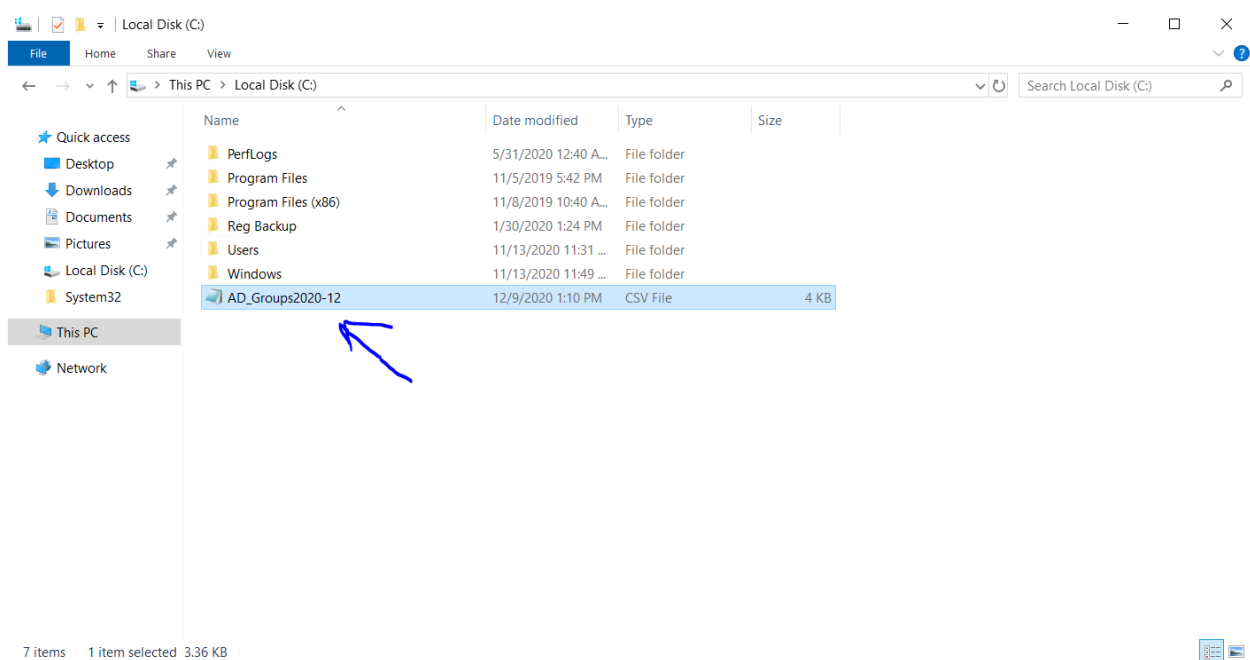

- Save the custom script file on the Drive

- Open Command Prompt
- Run the script by typing the below mentioned commands into CMD
  - *"Powershell -file get\_ad\_group.ps1"*

- This would save a CSV file in your C-Drive (C:/) with all the groups and their details

Once this file is created this can be imported into Youattest.

# Nested Group Campaign Feature - CSV Import and Group Selection

- **Import the CSV structure**

- Step 1: Report name, Import the CSV(upload)
- Step 2: Select the groups they want to pull report of and we will only generate report for these groups
- Submit
- Process in the background and send email once done

- **View Report**

- Run the Script in your AD and extract CSV file
- Save the CSV file on your machine
- Now to the screen on the right, please follow the steps:
  - Enter **Campaign** Name
  - Select a Due Date through the date picker
  - Choose the file already saved on your machine.
  - Upload the file
  - Once the file is selected
  - Hit Next

### Insert CSV for Nested Groups

---

**Campaign Name:**

**Due On:**

**Select your source CSV File:**  
 No file chosen

Please choose the file extracted through the AD Script and upload here.

List of all the groups captured by the AD script

- Select the groups you want to run the reports on.
- This would automatically select the sub-groups associated with the selected group.
- Specify, if you want to run the campaign on a Random sample from the selected groups i.e. based on Percentage value.
- Hit Done
