

User Access Reviews For: AWS

What we do

YouAttest is a cloud-based tool designed to enable enterprises to automate their access reviews for AWS and other resources - all at a fraction of the time, effort and cost.

YouAttest pulls root, user, group, policies and permissions in a single console. No more painful spreadsheets and email – the entire access review process is automated.

Designed from scratch by interviewing both IT Security and external auditors – YouAttest has quantified and automated the Access Review process.

Integration with AWS

YouAttest integrates with your AWS securely in minutes and then can conduct full fine grain entitlement audits based on your users and managers in your IAM system. YouAttest utilizes a secure tokenized connection to digitally connect and encrypt the connection between AWS, your IAM and YouAttest IGA. Utilized together the access review process is simplified and repeatable!

YouAttest Advanced Features for Identity Auditing:

- Audit AWS Root, Users, Groups
- Audit AWS Policies, Permissions
- Auto-Delegation
- Auto-Scheduling
- Multiple Reviewers
- Revocation Reports
- Time Stamped-Reports
- Export to PDF, XLS or CSV
- Real time Push of Changes
Remove Access/Keep Access

Benefits

YouAttest has been shown to reduce the time needed by all personnel involved by up to 80%. No more spreadsheets, emails, or snapshots – the purpose driven GUI solves your compliance requirements.
